REACH

As a downstream user, we undertake to use the substances as directed by the supplier. We are constantly investigating whether a substance is included on the candidate list and the approval scheme under REACH Regulation 1907/2006. We also continuously examine that we comply with our obligation to provide information to Article 33 of REACH. Our products do not contain very problematic substances (SVHC) in a concentration of more than 0.1% w/w and therefore do not require special information for our customers.

RoHS

Our products do not contain substances that are covered by the RoHS directive.

POP (persistent organic pollutants)

Our products do not contain POP substances on the restricted list, just as we do not have unintentional formation and discharge of POP substances on the restriction list.

Packaging Directive

As part of compliance with the Packaging Directive, we can state that the content of heavy metals (the sum of lead, cadmium, mercury and hexavalent chromium) in our products <100 ppm. Our packaging is 100% recyclable, used packaging comes back as new paper products or can be re-used.

TSCA (The Toxic Substances Control Act)

Our products do not contain substances on the restricted lists in the TSCA.

Regular update

This statement is based on the information we have received from our suppliers as well as our own product data. We continuously request the necessary information from our suppliers to fulfill our obligations under this statement.
