

Technical documentation regarding Packaging and Packaging waste regulation EU 2025/40

1. Identification of packaging

Name
Customer custom made packaging material (specific design for customer)

Description and area of use:

Honeycomb packaging (not intended for direct contact with food).

Producer: BEWI Denmark A/S

2. Raw materials and components

- Honeycell paper (Recycled paper)
- Paper (Recycled and Kraftliner)

3. Substances

None of the raw materials used in the declared products contains intentionally added PFAS.

The packaging do not contain heavy metals, and the sum of the concentrations of lead, cadmium, mercury and hexavalent chromium resulting from substances present in packaging do not exceed 100mg/kg

4. Recyclability

Honeycomb is 100% recyclable (together with cardboard)

The declared products are recyclable according to RecyClass evaluation tools.

- The products are designed for recycling, which enables the use of resulting secondary raw materials that are of sufficient quality when compared to the original material that they can be used to substitute primary raw materials
- when it becomes waste, it can be collected separately, sorted into specific waste streams without affecting the recyclability of other waste streams and recycled at scale

A third party verification on recyclability and recycling at scale will be presented when delegated acts for Design for recycling criteria and recyclability performance grades are adopted.

5. Recycled content

Article applies from 01.01.2030

BEWIs honeycomb products consist of recycled paper and new fibers depending on design and criteria of strength for the packaging needed.

BEWI are awaiting the delegated acts to be adopted for methodology for calculation and verification of the percentage of recycled content recovered from PCR.

6. Packaging minimisation

The packaging is designed to ensure compliance with all functional requirements, while minimising material use, volume and weight in line with PPWR requirements.

Once harmonised standards for calculation methodology and compliance measurement under this Regulation are established, BEWI will ensure that the required documentation is updated in line with the implementation timeline from January 2030.

7. Harmonised standards applied

- EC 1907/2006 (REACH)

Certifications:

- ISO 9001:2015
- ISO 14001:2015
- FSC License code: FSC-C149689, Certificate reg. code NC-COC-031895

8. Test reports/statements

Documents can be submitted at request:

- Letter of Declaration regarding REACH Conformity, Paper supplier
- Letter of Declaration regarding REACH Conformity, Honeycell paper supplier
- SDS, Honeycell
- FSC certificate from raw material suppliers
- REACH_SVHC below threshold, Ink supplier
- Letter of Compliance with regulations, Ink supplier
- Declaration of compliance Food, Bisphenol and Heavy metals, Glue supplier

Regards,

Marianne F. Nielsen

Environmental and Sustainability Manager

BEWI Denmark A/S
